Description Power supply [M-20055](#) | [M-20057](#)

Output

M-20055: 2 sockets outside the box, with hinged lid | **M-20057:** 3 sockets inside the box

Frequency: 50 Hz. AC output signal (battery mode):

Pure sine wave, nominal output voltage: 230 V. Continuous power: 250 W. Peak output power (watts): 300 W

Input

Nominal input voltage: 230 V AC. Recommended electrical supply: 15 A 230 V

Entry phase: single phase. Connection cable 0.5 m with IEC socket for safety separation in the event of incorrect operation.

Battery

Rechargeable lithium iron phosphate battery (LiFePo4). Nominal voltage: 12.8 V. Nominal capacity: 51,4 AH

Watt hours: 658 Wh. Life expectancy: 2500 cycles. Protection / communication: BMS / SMBus.

Operating temperature range: 0 ° C to +50 ° C. Charging time to 80%: 2,5 hours. Flame retardant housing, ABS plastic UL94: V-0. Weight: 5.8 kg

User interface, alarms and controls

- LEDs on the remote user interface (RUI)
- AC current, charge level and charge status of the battery
- Error message LED.
- On / Off switch and alarm mute switch
- Low battery alarm

Software

Clinic View - provides a simple and easily accessible view of the remaining battery charge from the medical cart.

Clinic View is aimed at users of PC workstations.

The technical view provides an overview of specific alarms,

event and data histories and enables the configuration of the cart identity information and the cart power system.

The information available in Tech View is most useful for medical technicians and cart maintenance providers.
